Team Members	Nancy.D, Mythely.J, Srimathi.K, Sahasri.C
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	2 Marks

Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am	*Describe customer with 3-4 key characteristics - who are you?*	An employee or new joiner who needs a standard company laptop and expects a quick, hassle-free ordering experience
I'm trying to	*List their outcome or "job" they care about - what are they trying to achieve?*	Request and receive an approved standard laptop quickly, without chasing multiple people for updates
but	*Describe what problems or barriers stand in the way – what bothers them most?*	Ordering, approval and procurement steps are handled manually, which causes delays and repeated follow-ups
because	*Enter the "root cause" of why the problem or barrier exists – what needs to be solved?*	Standard laptop requests are not automated in ServiceNow, so every order depends on manual emails, checks and purchase steps
which makes me feel	*Describe the emotions from the customer's point of view – how does it impact them emotionally?*	Frustrated, unproductive and uncertain about when the laptop will arrive

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	An employee or new joiner who needs a standard company laptop	Request and receive an approved standard laptop quickly	Ordering and approvals are manual and slow	Requests run through manual emails and spreadsheets	Frustrated and unproductive while waiting for the laptop
PS-2	An IT procurement or service desk team member	Process standard laptop orders accurately and on time	Repeated manual checks, approvals and purchase steps take too long	The order process is not automated with Flow Designer	Overloaded and worried about errors and delays
