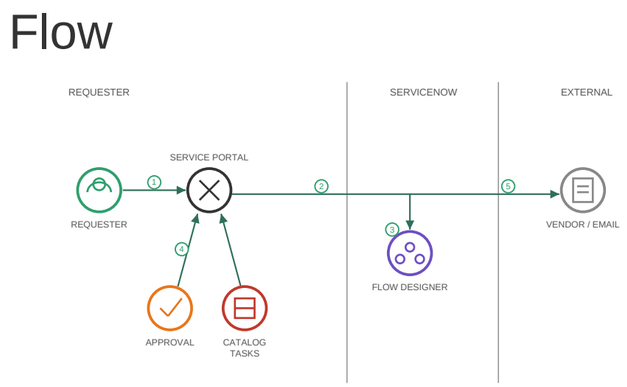
Project Design Phase-II
Data Flow Diagram & User Stories

Date	31 January 2025
Team ID	SWTID-2026-1951
Team Members	Nancy.D, Mythely.J, Srimathi.K, Sahasri.C
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	4 Marks

Data Flow Diagrams:

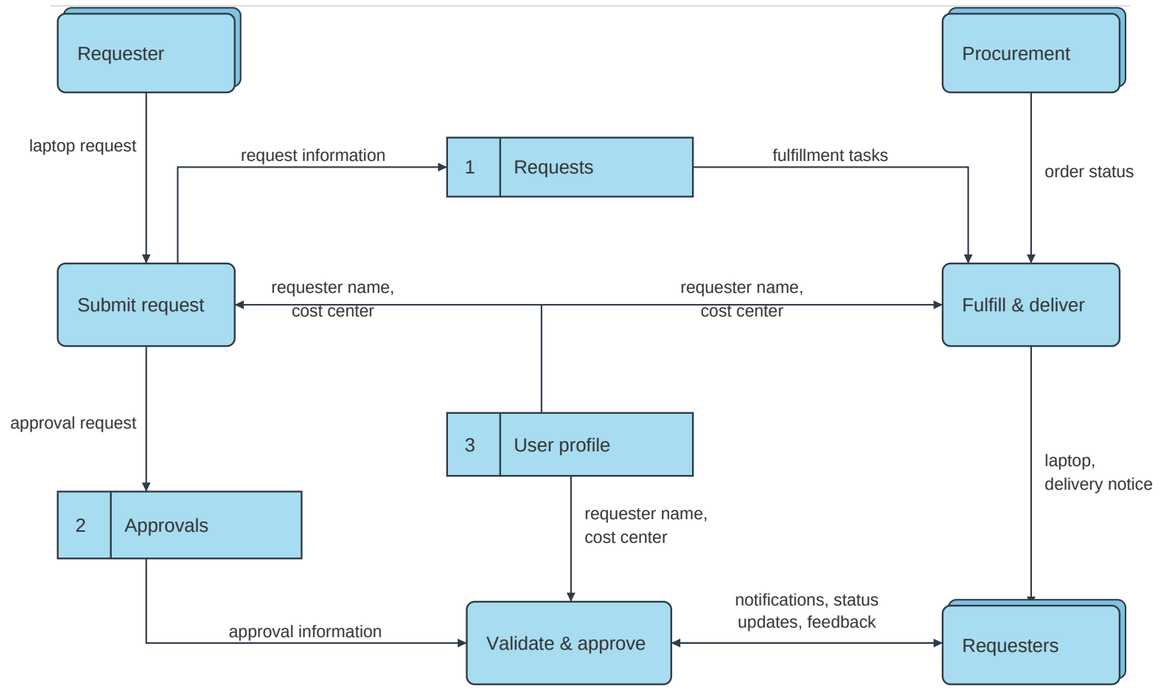
A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

Example: (Simplified)



1. Requester logs in to the ServiceNow Service Portal and opens the Standard Laptop catalog item.
2. Requester selects a laptop model and submits the request form.
3. Flow Designer triggers on the new request item and validates the model and budget.
4. The flow routes the request for approval, creates fulfillment tasks, and orders the laptop from the vendor.
5. Requester is notified by email and the asset record is updated in the CMDB.

Example: DFD Level 0 (Industry Standard)



User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Requester (Employee)	Catalog Request	USN-1	As a requester, I can browse the Hardware category and select a standard laptop model from the Service Catalog.	I can see the approved standard laptop models with specs and pricing	High	Sprint-1
		USN-2	As a requester, I can submit a laptop request by entering my justification, cost center, and delivery location.	A request (REQ) and request item (RITM) are created and I get a request number	High	Sprint-1
		USN-3	As a requester, I will receive a confirmation email once I have submitted the request.	I can receive an email with the request number and expected timeline	High	Sprint-1
	Request Tracking	USN-4	As a requester, I can track the status of my laptop request in the Service Portal.	I can see the current stage (approval, ordering, shipped, delivered)	Medium	Sprint-2
		USN-5	As a requester, I will be notified when my laptop is delivered.	I receive an email and portal notification with setup details	Medium	Sprint-2
Manager (Approver)	Approval	USN-6	As a manager, I can approve or reject my team member's laptop request from my email or approval inbox.	My decision is recorded and the flow continues or closes the request	High	Sprint-2
		USN-7	As a manager, I will receive a reminder for approvals that are still pending.	I receive an automatic reminder if I have not responded within the set time	Low	Sprint-3
IT Procurement Team (Fulfillment)	Fulfillment	USN-8	As a procurement officer, I will receive catalog tasks automatically once a request is approved.	A task is created and assigned to the correct fulfillment group	High	Sprint-2
		USN-9	As a procurement officer, I can place the vendor order and update the task status.	The task status updates and the request item progresses	High	Sprint-2
IT Asset Manager	Asset Management	USN-10	As an asset manager, I can see the delivered laptop recorded and assigned to the requester.	The asset record is created and linked to the requester automatically	Medium	Sprint-3
Administrator (Flow Developer)	Flow Automation	USN-11	As an administrator, I can build a flow in Flow Designer that triggers on standard laptop request items and automates approval and tasks.	The flow is active and runs automatically for each standard laptop request	High	Sprint-1
		USN-12	As an administrator, I can view flow execution history and receive alerts when a flow action fails.	I can see execution status and error details for each run	Medium	Sprint-3
