Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	31 January 2025
Team ID	SWTID-2026-1951
Team Members	Nancy.D, Mythely.J, Srimathi.K, Sahasri.C
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Service Catalog Request	Standard laptop catalog item in the Service Portal Request submission with justification, cost center, and delivery location Automatic request (REQ) and request item (RITM) number generation
FR-2	Request Validation & Approval	Automatic validation of laptop model and budget limit Auto-approval of standard requests within the budget threshold Manager approval routing for exceptions
FR-3	Automated Fulfillment (Flow Designer)	Flow triggered on new laptop request item Catalog task creation and assignment to the procurement team Vendor order placement and task status updates
FR-4	Notifications & Asset Tracking	Email notifications for confirmation, approval, and delivery Request status tracking in the Service Portal Asset record creation and assignment to the requester

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	The Service Portal catalog form is simple and consistent, so requesters can order a standard laptop in a few steps without training.
NFR-2	Security	Role-based access control limits who can view, approve, and fulfill requests, and request data is protected in transit and at rest.
NFR-3	Reliability	Flows include error handling and failure alerts so that failed actions are detected and no laptop request is lost.
NFR-4	Performance	Standard requests are validated, approved, and turned into fulfillment tasks within minutes of submission, with no manual effort.
NFR-5	Availability	The solution runs on the ServiceNow platform, so requesters can submit laptop orders at any time.
NFR-6	Scalability	The flow handles growing order volumes and can be reused for other standard items such as monitors and phones.
